

## CONTENTS NO.2, APRIL VOL.26, 2005

### REVIEW ARTICLES:

- The American lobster, *Homarus americanus*, contains morphine that is coupled to nitric oxide release in its nervous and immune tissues: Evidence for neurotransmitter and hormonal signaling**  
*Federico M. Casares, Anne McElroy, Kirk Mantione, Geert Baggermann, Wei Zhu & George B. Stefano* .....89-97
- Problems and possibilities in the differential diagnosis of Syndrome Spinocerebellar Ataxia**  
*Alena Zumrová*.....98-108

### CASE REPORT:

- Association between human leukocyte antigen (HLA) and interferon- $\alpha$  induced thyroid diseases in four patients with HCV-related chronic hepatitis**  
*Giancarlo Labbadia, Antonio Martocchia, Antonio Mammarella, Vincenzo Paoletti, Antonio Rocco, Rosalba Benvenuto, Proietti Antonella, D'Urso Rosaria, Simonetta Trabace, Antonino Musca & Paolo Falaschi* ..... 109-112

### LETTER:

- Association of G-protein beta-3 subunit gene (GNB3) T825 allele with Type II Diabetes**  
*Jawad G. Kiani, Mohammad Saeed, S. Hassan Parvez & Philippe M. Frossard*.....87-88

### ORIGINAL ARTICLES:

- Inhibitory effects of adrenomedullary hormone on the induction and growth of fibrosarcoma by methylcholanthrene**  
*Michiro Yanagisawa & Takashi Kachi* ..... 113-120
- Influence of maternal testosterone on the strategies in the open field behaviour**  
*Lucia Kršková & Alžbeta Talarovičová*..... 121-124
- Effects of prolactin on hypothalamic supraoptic neurones: Evidence for modulation of STAT5 expression and electrical activity**  
*Julie Townsend, Belinda J. Cave, Michael R. Norman, Andrea Flynn, James B. Uney, Domingo J. Tortonese & Jon B. Wakerley* ..... 125-130
- Treatment of autoimmune ovarian damage in adolescent girls**  
*H. Mlčochová, J. Hořejší, J. Martínek, R. Vetešníková-Koubová & M. Halaška* ..... 131-135
- Urinary 6-sulfatoxymelatonin excretion in humans during domestic exposure to 50 hertz electromagnetic fields**  
*Pierluigi Cocco, Maria Elisabetta Cocco, Loredana Paghi, Giuseppe Avataneo, Alessio Salis, Michele Meloni, Sergio Atzeri, Giorgio Broccia, Maria Grazia Ennas, Thomas C. Erren & Russel J. Reiter*..... 136-142
- Spinal cord lesions in diabetes mellitus. Somatosensory and motor evoked potentials and spinal conduction time in diabetes mellitus**  
*Pavol Kučera, Zoltán Goldenberg, Pavel Varsik, Darina Buranová & Pavel Traubner* ..... 143-147

**Investigation of serum leptin levels in professional male football players and healthy sedentary males**

Mehmet Unal, Durisehvar Ozer Unal, Abdulkerim Kasim Baltaci, Rasim Mogulkoc & Abidin Kayserilioglu ..... 148-151

**Gender-related Differences in Prolactinomas. A clinicopathological study**

Bernhard Schaller..... 152-159

**ANNOUNCEMENT – NEXT COMING NEL SUPPLEMENT:**

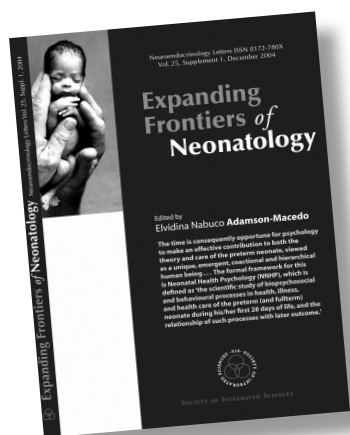

**Current Best Treatment of Bipolar Disorders with Second Generation Antipsychotics by**

Marek Jarema, Ljubomir Hotujac, E. Timucin Oral, Janusz Rybakowski, Norman Sartorius & Jaromir Švestka ..... 160

**Information from the Editorial Office:**

Department on Biometrics and Statistics was established at the Neuroendocrinology Letters on April 15, 2005. Professor Miroslav Mikulecky M.D., DrSc. was appointed to chair this department.

Peter G. Fedor-Freybergh  
Editor-in-Chief: Neuroendocrinology Letters

**Published in December 2004**

Neuroendocrinology Letters presents Supplement 1, Vol. 25, 2004: **“Expanding Frontiers of Neonatology”**
